

Information Bulletin

APPROVED HAZARDOUS WASTE TRANSPORTERS

August 2008

In line with the requirements for the transportation of hazardous waste as outlined in Technical Guideline Number 50, this information bulletin itemizes those companies and transport vehicles that have received a permit from the Environment Department for the transportation of hazardous waste. This list will be updated on a six monthly basis since only vehicles, which have been approved by the Department and hold a valid transport permit are permitted under the conditions of Local Order 61/1991 to transport hazardous waste.

All generators seeking approval for the disposal of hazardous waste under the requirements of either Technical Guideline Number 26 or annual approval issued by the Environment Department are reminded that disposal applications will be approved and accepted only if the selected transporter/vehicle is from the following list.

Prior to submitting an application for hazardous waste disposal, generators are suggested to contact more than one of the following approved transport companies in order to seek the best rates and service for that particular approved class of hazardous waste.

The below table lists the Waste Transport Codes:

CODE	WASTE TYPE
A	Acid, Alkali or Corrosive Waste
B	Liquid Hazardous Waste (wastewater)
C	Solid Hazardous Waste (general) & Pharmaceuticals
D	Waste Which Present a Dust Hazard
E1	Waste Oil
E2	Oil Sludge
F	Flammable Waste & Waste Solvent
G	Reactive Waste & Chemical Waste
H1	Clinical Waste
H2	Pharmaceutical Waste

List of Approved Vehicles For Transportation of Hazardous Wastes (2008)
